

PRISM
NON-NATIVE PLANT INVASIVENESS RANKING FORM
 New York Partnerships For Regional Invasive Species Management

PRISM: Long Island Invasive Species Management Area

Scientific name:	<u>Iris pseudacorus</u>	USDA Plants Code: <u>IRPS</u>
Common names:	<u>Yellow iris</u>	
Native Distribution	<u>Europe, north Africa and Mediterranean region</u>	
Date Assessed:	<u>17 March 2008, 18 June 2008, 1 July 2008</u>	
PRISM Assessors:	<u>Jinshuang Ma, Steven Clemants, Gerry Moore</u>	
PRISM Reviewers:	<u>LIISMA SRC</u>	
Date Approved:	<u>July 9, 2008; edited Dec.15, 2008</u>	Form version date: <u>25 August 2008</u>

New York Relative Maximum score: 76.00 Date NY assessment approved: July 9, 2008
 New York State Invasive Rank: High

SUMMARY OF PRISM RANKING RESULTS:

Distribution: Widespread

Estimated number of infested sites: >30

PRISM Invasiveness Rank: High

A. DISTRIBUTION AND ABUNDANCE (KNOWN/POTENTIAL):

1. What is the species distribution and abundance in the PRISM?

- | | |
|--|-------------|
| A. Not present | Not Present |
| B. Occurs in three or fewer natural areas (locations that are at least ¼ mile apart) with no infested area* >1 acre or containing >100 individuals | Restricted |
| C. Present in 4–10 natural areas, or with one occupied location >1 acre or containing >100 individuals | Common |
| D. Present in >10 minimally managed areas | Widespread |
| U. Unknown | Unknown |

Answer: Widespread

Describe distribution:
 Widespread in LIISMA PRISM.
 Sources of information:
 Brooklyn Botanic Garden, 2008; Weldy & Werier, 2005.

*Definition of “infested area” is the “...actual or percentage of land occupied by [canopy cover of] weed plants” NAWMA (North American Weed Management Association) 2002. North American Invasive Plant Mapping Standards (see <http://www.nawma.org/>).

PRISM
NON-NATIVE PLANT INVASIVENESS RANKING FORM
 New York Partnerships For Regional Invasive Species Management

2. What is the likelihood the species will occur (if not yet present) or expand its distribution and abundance (if already present) in the PRISM?

Answer:

Documentation (e.g.: history of establishment in PRISM, suitability of habitats and climate, distribution models, literature, expert opinions):
 Likely to form new colonies especially in disturbed areas.
 Sources of information:
 Brooklyn Botanic Garden, 2008.

B. INVASIVENESS RANK IN THE PRISM:

Is the species distribution Widespread or Common?

Yes: Go to column A in table below.

No: What is the likelihood of species occurrence or expansion? Answer:

- Very Likely: Use column A below
- Moderately likely: Use column B below
- Unlikely: Use column C below
- Zero likelihood Invasive potential Insignificant
- Unknown Invasive potential Unknown
- Not assessed Invasive potential not assessed

Assign a PRISM invasiveness rank to the species based on its New York Relative Maximum Score, using the designated column in the table below.

New York Relative Maximum Score	New York Invasiveness Rank	A	B	C
> 80.00	Very High	VH	H	M
70.00–80.00	High	H	M	L
50.00–69.99	Moderate	M	L	Ins
40.00–49.99	Low	L	Ins	Ins
<40.00	Insignificant	Ins	Ins	Ins

Column used: __ (Insert PRISM Invasiveness Rank on page 1)
